

40G fiber optic cable and optical module integrated

Our QSFP+ active optical cable assemblies are constructed using premium optical cable and feature active QSFP+ (SFF-8436) connectors with pull-tab ejectors for easy connection to equipment. These ...

The series of product adopts LC or MTP/MPO connector and operates over Single Mode or Multimode optical fiber. They can be used for connections from 150m up to 40km and are suitable for 40G ...

40G QSFP ER4 optical transceiver module, support 40Gb/s and up to 40 km transmission on SM fiber, it works in high-speed IDC connection solutions, and so on.

AOC's QSFP+ offer customers flexibility of traditional optical modules by interfacing to systems via a standard InfiniBand, Ethernet, Fiber Channel and other applications.

This solution can be deployed with a single active optical cable (AOC) with integrated QSFP28 and SFP28 transceivers or by a passive fiber breakout cable/multiplexer.

Optical module internal optical interconnect product solutions are applied inside optical modules, including QSFP QSFP+, QSFP28, QSFP-DD, CXP2 and other optical module models, which support ...

Learn key differences in cost, distance, power, and compatibility to choose the right solution for your data center upgrade. While 100G and 400G ...

Learn key differences in cost, distance, power, and compatibility to choose the right solution for your data center upgrade. While 100G and 400G technologies continue to advance, 40G ...

Arista's Optical Modules and Cable portfolio offer a wide variety of high-density and low-power 800G (dual 400G), 400G, 200G, 100G, 50G, 40G, 25G, 10G, 1G, and 100M Ethernet connectivity options ...

An AOC (Active Optical Cable) is a high-speed data transmission cable that combines optical modules and fiber optic cables into a single integrated unit. It mainly consists of fiber optic cables, optical ...

Amphenol provides a series of 40G QSFP+ optical module products, including SR4, eSR4, IR4, LR4, ER4 lite, AOC and AOC breakout series.

It enables high-bandwidth 40G optical links over 12-fiber parallel fiber terminated with MPO/MTP multifiber female connectors. It can also be used in a 4x10G mode for interoperability with 10GBASE ...
