

Adss optical cable pre-twisted double suspension clamp

AS-FTTH-ACC-16E-3 Product Name: ADSS optical cable suspension clamp, pre twisted suspension clamp J-type suspension clamp fixing fixture

ADSS Suspension Clamps, also known as Prefabricated Suspension Clamps or AGS Suspension Clamps, offer a full range of aluminum cladding, rubber, armored clamps, bolts, and nuts to support ...

Application: OPGW preformed suspension clamp is mainly used to support the suspend OPGW cable. It is suitable for the OPGW cable, conductor and grounding wire on transmission line. It is ...

It eliminates the procedures of erecting poles, erecting steel strand suspension wires and hanging pulleys on the suspension wires to lay optical cables. It can fly directly across fields, ditches and ...

Model and specification of double suspension clamps for ADSS optical cables (grip strength no less than 15% of the rated tensile strength of the optical fiber).

Leader in Optical Communication & Power Transmission Optical Communication: FTTH cables, ADSS/OPGW cables, fiber jumpers/pigtails, FAT/FDT distribution boxes, optical network ...

This product is a combination of wire clip, equipped with two sets of aluminum splint, two sets of rubber fixture, a set of outer pre-twisted wire and a set of wire protectors pre-twisted wire.

Two sets of suspension components are adopted to improve the mechanical strength of the wire clamp, increase the radius of curvature, and ensure the safe and reliable operation of the optical cable under ...

The Pre Twisted Suspension Clamp is a specialized hardware component designed for overhead power transmission and ADSS fiber cable. It is engineered to securely hold and support pre-twisted ...

According to the model and parameter requirements of ADSS optical cables, we can provide suspension clamps with different pitches, tensions, and outer diameters, which are divided into tangent clamps ...

Adss optical cable pre-twisted double suspension clamp
