

Anritsu OTDR Fiber Optic Tester MT9085A6

This all-inclusive optical pulse tester was developed with a full range of functions, including a light source and optical power meter for measuring and finding faults in optical fibers.

OTDR (Construction) OTDR (Construction) allows users to test many fibers in series and save the measurement results to files. If specify the wavelength and number of fibers to be tested, the ...

The ACCESS Master MT9085 series is a compact handheld all-in-one tester for performing optical pulse tests, optical loss/power measurements, and optical fiber end-face inspections.

Equipped with multi-parameter measuring features, the MT9085 Compact OTDR Tester boasts built-in optics power meters, stabilizing sources of lights, and face inspection of videos of fiber alternatives.

The ACCESS Master Anritsu MT9085 series is a compact handheld all-in-one tester for performing optical pulse tests, optical loss/power measurements, and optical fiber end-face inspections.

The Anritsu MT9085A Series ACCESS Master OTDR is a compact, handheld optical time domain reflectometer (OTDR), suitable for performing optical pulse tests, optical loss/power measurements, ...

Combining high performance with user-friendly operation, this OTDR is an essential tool for technicians working in fiber installation, maintenance, and troubleshooting. Equipped with a high-resolution 8 ...

The ACCESS Master Anritsu MT9085 series is a compact handheld ...
