

Automated polishing machines for fiber optic connectors are designed for efficient ...

FLex is capable of polishing a variety of waveguide components such as PLCs, PIC optical chips and fiber arrays. It integrates universal carriers that can accommodate components of various ...

With the ACP24/96 you can now automate polishing times, pressure, & motor speeds for each step. Complete polishing procedures are stored inside of the ACP24/96 to save time and ensure ...

The OptiPrep(TM) System is designed for production polishing of a wide variety of optical components including Ferrules, Connectors, Waveguides, Silicon V-groove, Optical Chips, Capillary/Glass ...

Our precision fiber optic connector polishing machines are designed for superior performance. Domaille Engineering Fiber Optic Equipment's polishing machines deliver accurate, repeatable geometric results.

Connected Fiber's O.A.S.I.S. is a stand alone cleaning workstation for any of our industry's polishing machines or where sink is not available. Optional air/water spray gun available.

The polishing of FA fiber arrays is a critical step in their manufacturing process. By precisely controlling the polishing process parameters, the optical performance and reliability of the FA fiber array can be ...

View our fiber optic polishing product line including a comprehensive database of polishing blogs, tips, Q&A, news, videos and technical papers.

Automatic, multi-port polishing of all commercial and military-style connectors Single, universal work holder for all UPC ferruled connectors from 1.25 mm to 3 mm ferrule outer diameters

With the ACP-24 you can automate fiber stub removal, polishing times, pressure and motor speeds for each step. Complete polishing procedures are stored inside of the ACP-24 to save time and ensure ...

Automated polishing machines for fiber optic connectors are designed for efficient series production. With programs for repeatable operation, you can process up to 48 connectors simultaneously in a ...
