

Our busbar systems for electrical installations offer a particularly easy way of fitting distribution systems with electrotechnical components. The modular design saves space, while quick assembly contacts ...

NEMA defines a busway as a prefabricated electrical distribution system consisting of bus bars in a protective enclosure, including straight lengths, fittings, devices and accessories.

Distribute power with ease with Vertiv(TM) Powerbar patented range of busbar trunking that delivers power safely, efficiently, and with greater flexibility. Break free from tangled and complex cabling situations

HOLDONE Bus Duct Systems are advanced conduits for efficiently transporting electricity to different parts of a facility. These systems replace conventional wiring in large buildings and industrial ...

Power Busway Systems are manufactured for the transport and distribution of electrical energy from 32A to 6000A. Power Busway System is a modular energy transmission and distribution system created ...

Optimize operations and maintenance with integrated digital solutions and low-voltage systems for power distribution. Our busbar trunking systems provide an efficient, safe and flexible alternative to ...

The Vertiv(TM) Powerbar busway system patented range of busbar trunking adds overhead power distribution to your data center, allowing increased accessibility to power loads for maintenance.

At SR Switchgear, we design and manufacture robust, reliable, and energy-efficient bus duct systems that offer an ideal solution for distributing electrical power over long distances with minimal energy loss.

Pmax series bus duct is ideal for use in airports, rail transit projects, data centers, large shopping malls, hospitals, industrial plants and other projects as an effective high-current power distribution system.

Powerbus(TM) plug-in busway, manufactured by Schneider Electric, was designed specifically to address the low power distribution needs of industrial and commercial customers.
