

Formed side rails are welded to 15/8 in. wide rungs to provide maximum rigidity and strength. Rung design includes exclusive Ty-Rap cable tie slots on 1 in. centers.

Basic components of steel cable trays are normally fabricated from either hot or cold rolled carbon steel strips of commercial quality. Steels in this category are ASTM A-569 and A-366.

Stainless steel cable trays have sturdy structure, resist rust and they are specified for cable containment and cable support in oil, gas, petroleum, offshore, marine and a wide range of applications.

Cable tray length is selected based on the load to be supported, the distance between the supports (also referred to as the span), and handling and installation constraints.

Choose from our selection of cable trays, including over 850 products in a wide range of styles and sizes. Same and Next Day Delivery.

Our cable tray systems meet or exceed all the NEMA, UL, CTI, and CSA standards and are utilized in nearly every industry. All cable tray suppliers are not the same.

Steel Cable Tray Steel Cable Tray systems are Certified CSA Cable Tray, UL listed, and NEMA certified and are available in the following material types 316 Stainless Steel Cable Tray, 304 Stainless Steel ...

Pre-Galvanized Steel: Straight sections, fitting side rails, rungs, and covers shall be made from structural quality steel meeting the minimum mechanical properties and mill galvanized in accordance with ...

Cable Tray and Cord Reels Precision engineered. Constructed from high-quality welded steel wire, Cablofil®; Wire Mesh Cable Tray is the result of decades of research and over 94,000 miles of ...

Marlin Steel's wire mesh cable trays are designed for high-performance cable management in data centers, industrial manufacturing, power distribution systems, and commercial infrastructure projects.
