

Get to know how to select strong cable tray systems in oil and gas plants. Pay attention to the 316L stainless steel, safety compliance, and corrosion resistance to avoid the loss of time.

Some applications may require the cable tray to support the weight of a single, dead object in addition to the cable loads. Specifications typically require this to be applied at the midpoint of the span between ...

Our wind certification report provides you with list of acceptable B-Line series cable tray supports, fittings and covers based off of the environmental conditions, cable loading, and type of cable tray in your ...

Nonmetallic cable tray systems have been tested and proven in the harsh environment of the offshore oil and gas industry. This tray is ideally suited to withstand the corrosive conditions inherent in the ...

We recently merged with Ocean-1, a market leader in the supply of ABS approved cable tray systems and related support products to the Marine, Offshore, Onshore, Rig, Shipbuilding and Oil & Gas ...

TechLine Manufacturing provides engineered cable tray systems and electrical/instrumentation supports for the full spectrum of oil & gas infrastructure -- from offshore platforms and coastal processing ...

Explore Prysmian's onshore oil and gas cable systems designed for drilling rigs, wellhead connections, and industrial trays with UL and CSA reliability.

Pre-engineered modular pipe racks are structures designed and built specifically to support multiple pipes where adequate structure is not available. They are mainly used to run petroleum or natural ...

Explore cable management systems that offer maximum protection and durability in caustic, wet conditions like oil platforms and petrochemical processing plants.

The placement of cables, ducts, and conduits can be done using cable trays - for both outside plant (OSP) and interior spaces (ISP). This allows cables and ducts to be installed quickly and readily ...
