In contrast to the modem situation, any router can work with a fiber connection. That's no exaggeration, either--if it has an Ethernet port (and nearly every modern router does), you can ...

In many cases, you have the option to use your own router with your fiber connection, especially if your ISP provides a separate ONT. You will never need to buy your own ONT, as this is specific to the ...

Instead, you need an ONT to handle fiber-optic signals. If you attempt to use a modem, it simply won't work because it lacks the necessary hardware to process optical signals.

Yes, you need a device called an optic network terminal, or ONT. ONTs are small boxes that convert light signals into data so devices can connect to the internet. And here at Fidium Fiber, ...

Any standard router, including the primary unit of a mesh Wi-Fi system, will work at its full potential with any standard Internet broadband terminal device --modem, Fiber-optic ONT, or others. ...

The short answer is no. Fiber internet connections do not use traditional modems. Instead, they typically rely on an ONT, which is short for Optical Network Terminal, or a fiber optic modem. These devices ...

In 2026, many fiber providers deploy a gateway -- a single unit that combines the ONT and a Wi-Fi router -- eliminating the need for separate boxes. You cannot reuse a cable or DSL ...
