

# Can access the internet with fiber optic cable but no router

Unsure if you need a modem for fiber internet? Here's everything you need to know to ensure you get the right equipment for your fiber-optic connection.

Fiber internet eliminates the need for a traditional modem. Instead, users rely on an optical network unit, which serves as the gateway between the fiber line and home devices. In the ...

The good news: Fiber-optic internet does not require a special router in most cases. Since the ONT handles the signal conversion, you can use virtually any quality router that supports ...

Wondering if you can use your own router for fiber internet? Learn about compatibility, setup tips and what to consider before replacing your equipment.

While the ONT is necessary for converting the fiber optic signal, you will still need a router to distribute the internet connection to multiple devices within your home or business.

Fiber internet doesn't need a modem but requires an ONT to convert fiber signals for your router. Learn how fiber ONT works and how to set it up properly.

To put it simply, fiber internet doesn't need a modem, but it does need an ONT and a router that can handle fiber. If you have the right tools, you can get the most out of your fiber internet connection and ...

Understanding this distinction is vital because it clarifies why a traditional cable or DSL modem is incompatible with fiber optic connections. You cannot use your old cable modem to connect to a fiber ...

Any standard router, including the primary unit of a mesh Wi-Fi system, will work at its full potential with any standard Internet broadband terminal device --modem, Fiber-optic ONT, or others. ...

Yes, you generally need both a modem and a router for internet access. While the modem connects your devices to the internet service provider's network, the router establishes a ...
