

Cisco 400G QSFP-DD High-Power (Bright) Optical module is mechanically compliant to the QSFP-DD Type 2A Module Specification. The QSFP-DD module contains a PCB with a 76 ...

Form Factor--Juniper's 400G optical transceivers incorporate the Quad Small Form-factor Pluggable Double Density (QSFP-DD) form factor to meet high power and thermal requirements for 400 Gbps ...

High optical transmitter output power greater than +1dBm for 400G transmission over ROADM line systems including those with colorless multiplexing architectures.

The Hyper photonix 400G QSFP-DD ZR+ transceiver is a high performance, cost effective module for optical data communication applications from 100G to 400G.

This report is an exhaustive analysis of the InnoLight 400G QSFP-DD optical transceiver, including a full analysis of the laser die, photodiode die, the TIA circuit, GaAs laser driver circuit, the PAM4 DSP ...

Many network operators compare QSFP-DD vs. OSFP when selecting transceivers for 400G and 800G deployments. While both form factors support high-speed ...

The high performance and low power of the 400G QSFP-DD ULH module make it an optimal choice to extend Routed Optical Networking use cases to regional and ultra-long-haul ...

The QSFP-DD 400G is the latest revolutionary standard in network connectivity. With an incredible data speed of 400 Gbps, this compact, high-density module meets the growing needs of data centres.

Many network operators compare QSFP-DD vs. OSFP when selecting transceivers for 400G and 800G deployments. While both form factors support high-speed networking, they differ in design, ...

The 400G QSFP-DD ZR+ is a C-Band optical frequency tunable coherent optical module, combines 7nm coherent DSP ASIC functionality with best in class ultra-narrow line-width tunable ...

The QDD-ER8-400G Module supports link lengths of up to 40km over a standard pair of G.652 single mode fiber (SMF) with duplex LC connectors. It is compliant to IEEE 802.3cn protocol and 400GAUI ...
