

100G ZR for Single-Fiber Operation The industry's first dual-laser QSFP28 DCO module for single-fiber, bi-directional applications delivers 10x capacity upgrades on existing 10G ...

1.6T direct-attached copper cables provide up to 1600Gbps aggregate throughput and can be applied in liquid cooling environments. Integrated with a heat sink and airflow channels, enhancing the cooling ...

1.6T DR8/DR8+/2xDR4/2xDR4+ OSFP PAM4 Optical Transceiver ical interconnects for data communications applications. The high bandwidth module supports dual 800G Ethernet or InfiniBand ...

1.6T-DR8 OSFP224 LPO based on 8 channels of 200G-PAM4 electrical and optical parallel lanes, 500m maximum reach via single mode fiber, case temperature range of 0?-70?, comply with IEEE802.3df ...

2D VCSEL Array: This new interconnect delivers 1.6T capacity for short-reach AI/ML datacenter links. It combines ultra-low latency with cost-effective scalability, which is honestly pretty ...

Compared to IMDD equivalent offerings for the same applications, 1.6T Coherent-Lite delivers a higher loss budget at comparable power and latency, mitigates for crosstalk, and scales ...

The multiple variants of EML, Silicon Photonics and InP PIC solutions are available for the 1.6T DR8 product types. This represents a critical milestone to enable next generation 51.2T and 102.4T switch ...

Designed for single-fiber, bi-directional links, it enables 10x capacity gains, doubles fiber inventory, and supports applications from wireless towers to cable TV network expansion.

The newly released product-grade 100GBd EMLs enable 200Gb/s single lambda PAM4 signaling for shipping 1.6T and 800G transceivers. The 800G FR4/LR4 optical modules will be demonstrated at the...

Figure 4 Block Diagram of Transceiver <Transmitter Section>: The OSFP-1.6T-2xDR4 converts 8-channel 106.25Gbd electrical data to 8-channel 1311nm 106.25Gbd optical signals for 1.6Tbps optical ...

Designed for single-fiber, bi-directional links, it enables 10x capacity gains, doubles fiber inventory, and supports applications from wireless towers to ...

800G and 1.6T per fiber is available today.
