

What is Micro Trenching? MicroTrenching is the placement of reduced diameter MicroDuct pathways into the utility space with reduced impact on the existing infrastructure.

Our powerful micro-trench digging machines are prepared to work on any terrain with great speed and effectiveness. We have solutions for the instantaneous collection of debris: the trench is left totally ...

With the MT26, operators can create a clean, deep, narrow trench in one easy pass, and easily install cable deep enough to meet most requirements ...

Capable of cutting up to 600mm depth with a narrow (100mm) or wider (300mm) width cutting wheel. This offers an effective answer for the laying of ducts, pipes or cables. The Power Trench equipped ...

Do KEMROC offer trenching tools for fiber optic cable installation? Absolutely, KEMROC attachments, particularly the DMW Rock Saws and EK Chain Cutters, are well-suited for precise and narrow ...

A brand-new model, Marais patent - the ideal solution to deploy fiber optic networks in urban and narrow environment. Thanks to its vacuum system, the equipment performances clean ...

The innovative and powerful Ditch Witch MT16 microtrencher delivers clean, precise cuts through asphalt or concrete, helping utility contractors install fibre-optic cable along paved rights-of-way with ...

With the MT26, operators can create a clean, deep, narrow trench in one easy pass, and easily install cable deep enough to meet most requirements with minimal disruption to the ...

An ideal trench for fiber-optic cable installation, the narrow, small trench enables contractors to install fiber shallower than other utilities with minimal disruption to the surrounding infrastructure.

Instead of laboriously digging up the roads with an excavator, micro-trenching simply involves cutting a narrow slot directly at the curb, ...

Instead of laboriously digging up the roads with an excavator, micro-trenching simply involves cutting a narrow slot directly at the curb, allowing the micro pipes or fibre optic cables, but also other cables or ...

Complete microtrenching projects with the Vermeer reinstatement machine, a versatile tool for backfilling and reinstatement after conduit placement in fiber-optic and other utility installations.
