Sabotage suspected after undersea communication cables were severed in the Baltic Sea

The Baltic Sea region is on alert and the NATO alliance has boosted its presence after a series of power cable, telecom and gas pipeline outages since Russia invaded Ukraine in 2022.

On 17-18 November 2024, two submarine telecommunication cables, the BCS East-West Interlink and C-Lion1 fibre-optic cables, were disrupted in the Baltic Sea.

In late 2024 and early 2025, several important data connections across the Baltic Sea were broken, including between Sweden and Lithuania. The cable breaks received a lot of attention and raised...
