

# Does a 30Mbps router affect a 100Mbps fiber optic connection

If your ISP provides, say, 200 Mbps, but your Wi-Fi is only capable of 100 Mbps, the wireless connection becomes a bottleneck. Conversely, a Wi-Fi 6 router can support speeds much ...

Most traditional routers support FTTP-enabled internet connection, but cannot efficiently handle the high-speed data transmission of fibre optic technology.

While your current router might physically connect to the fiber network via an ONT and Ethernet cable, its capabilities will dictate whether you actually experience the blazing-fast speeds and robust ...

To prevent your router from "bottlenecking" your network, we recommend using a router that's capable of faster speeds than your Internet connection. To see how much bandwidth your ISP ...

In this video, I share my personal experience of switching from Jio Fiber's 30 Mbps plan to a 100 Mbps local fiber connection.

New, high-quality modems and routers are designed to handle the speed and bandwidth of fiber internet. Aging equipment can be a significant bottleneck between your high-speed fiber and the ...

It may be true that, for example, your router is throttled to 30 Mbps, but the transmission over copper may produce more errors than over fiber. This usually results in retransmissions (TCP ...

If you have a fast fiber connection but aren't getting good Wi-Fi speeds, there are a few things you can do: Place your router in the middle of your home, so your devices are closer to it and ...

Routers allow devices like computers, smartphones and smart TVs to connect to the internet and communicate with each other. This article explores how routers and modems influence your internet ...

Once your communication leaves the Fiber network, we can't ensure you'll receive maximum speeds due to heavy traffic or substantial rerouting delays at any time.

A new router can't increase your internet connection speed--your 300Mbps plan stays the same. But a new router can make your Wi-Fi network run faster, especially if you're upgrading ...
