

Door-to-door shipping of 25G QSFP-DD optical modules to Slovenia

Systems designed with QSFP-DD modules will be backwards compatible, allowing them to support existing QSFP-DD or QSFP modules and provide flexibility for end users and system designers.

Now, we deliver interconnection solutions for high-speed, vibration-resistant, ruggedized, shockproof, and waterproof requirements in MATIC (Medical, Aerospace, Transportation, Industry, ...)

25G Electrical Loopback TX to RX Output with CDR.

Compatible with 25G/Lane NRZ up to 112G/Lane PAM4 signaling protocols that allow cables to deliver aggregate bandwidths of 200G, 400G, and 800G per cable assembly. Available in ...

Systems designed with QSFP-DD ports are backwards compatible to support existing QSFP+, QSFP28, and QSFP56 modules. This provides flexibility for network designs and migrations to next-generation ...

To accommodate an increasing spectrum of applications, Arista offers a wide choice of OSFP, QSFP-DD, QSFP, SFP, SFP-DD and DSFP transceivers and cables that comply with industry standards, ...

Our QSFP-DD cages feature a proprietary heat sink design, making them the only solution to work in 15-18W applications at a low cost - providing superior thermal and signal integrity performance.

QSFP-DD Interconnect System enables faceplate density equal to the current 2x1 QSFP form factor, but with 8-lane ports. In other words, a total of 256 differential pairs with 32 ports delivers double-lane ...

Compare SFP vs. QSFP transceivers: key differences, speeds, distances, costs, and expert guidance to choose the right module for your network architecture.

The typical applications for 800G/400G NVIDIA multi-mode optical modules are illustrated below: The optical modules involved are: the 800G OSFP SR8 (Dual MPO) and the breakout 400G ...
