

# Dual-circuit intelligent power distribution cabinet

They safely and efficiently manage and distribute power to multiple devices through a single input power connector, per PDU, to enhance scalability of network build outs.

Power conditioning and distribution cabinet that offers the benefits of a custom-tailored system, with the convenience and cost savings of a pre-packaged, factory-tested system.

Designed and engineered to meet the exact needs of our clients, PowerPak 2 PDU brings with it a powerful combination of flexibility and modularity. With hundreds of possible configurations, ...

RackPower Intelligent Power Distribution Units address controlling power on Cabinets as well as Open Frame Racks and Wall-Mount enclosures. Design your power solution using a variety of ...

Introducing the industry's most innovative energy metering rack power distribution units (PDUs) designed to simplify rack management in your data centre.

Explore how precision power distribution cabinets with intelligent monitoring transform data center power management--from rack-level control to power quality analysis and zero ground ...

The ENERGY MANAGER SERIES from ICT is a 2U, intelligent 300-amp dual-feed DC distribution panel for negative 48-volt DC applications, providing remote monitoring and power control of up to 12 ...

The EL2P PDU provides reliable, intelligent power distribution in hospitals and clinics, reducing install complexity and enhancing uptime for medical networks and digital records systems.

This cabinet integrates components such as circuit breakers, transformers, and monitoring devices to safely and reliably manage power distribution across different loads.

However, unlike traditional Power Distribution Units (PDUs), an iPDU goes beyond basic power delivery by incorporating intelligent features and network connectivity, allowing for real-time monitoring, ...
