Whether you're targeting the Infrastructure and construction sector in Syria, or expanding across regions, we provide live, accurate, and relevant updates every day.

In the 2000s, Syria's electric power system struggled to meet the growing demands presented by an increasingly energy-hungry society. Demand grew by roughly 7.5% per year during this decade, fueled by the expansion of Syria's industrial and service sectors, the spread of energy-intensive home appliances, and state policies (i.e. high subsidies and low tariffs) that encouraged wasteful energy practices. Syria's inefficient transmission infrastructure compounded these problems: In 2002, Electricity Minister Munib ...
