

Buy FD-620-10 - AUTONICS - Fiber Optic Sensor, Diffuse Reflective, 120mm Sensing Range. Newark Electronics offers fast quotes, same day dispatch, fast delivery, wide inventory, datasheets & ...

The FD-42G is a Reflective Small Spot Fiber Sensor with top-view beam direction. Sensing of minute objects can be performed by combining the fiber and spot lens.

The Autonics FD-620-10 is a diffuse reflective fiber optic sensor unit from the FD/GD Series, optimized for applications requiring long fiber routing up to 10 meters.

The Panasonic FD-42G Optic Fiber Sensor is a compact and versatile reflective fiber optic sensor head, designed for precision detection in tight and demanding industrial spaces.

Unlike copper-based sensors typically found in kitted solutions, the FD322-Rapid Fiber kits include FSI's advanced fiber-optic sensor that is unaffected by harsh environments, including UV radiation, ...

Digital Fiber Optic Sensors FS-N series Digital Fiber Optic Sensor FS-V30 series What is a Fiber Optic Sensor? A fiber optic sensor is an instrument that measures light from an LED (or other device) for ...

Panasonic Industrial Automation FD Reflective Type Fiber Optic Sensors offer reduced risk of breaking and bending during installation and tough, high-quality fiber in a reflective package ...

Reflective type FD-S23 has been added. Ultra-small diameter fibers with a compact head ensure precision centering accuracy to stably detect minute parts. Since it has a thin, rectangular shape, it ...

The FD504(TM)/FD508(TM) incorporates Fiber SenSys" proprietary and patent-pending technology that has been successfully deployed in thousands of sensors throughout the world in a versatile fiber-optic ...

Panasonic FD-66; FD Series; Fiber Optic Sensor; 0.5 ms response time; NPN/PNP selectable output; 12-24VDC power; IP40 enclosure. High-Speed Response: Ensures rapid detection for critical ...
