

New flexibility level: Advanced V-Groove structuring supports simultaneous manufacturing of different pitches and groove shapes (V, U, convex, concave, freeform) within the same array.

The arrays are manufactured using Pyrex V-Groove substrates in conjunction with a Pyrex lid or precision silicon wafer V-Groove, enabling sub-micron alignment accuracy with UV cure attachment ...

The design of the V-Groove arrays offered by OZ Optics allows for up to 48 fibers to be connected at one time, maintaining the appropriate fiber spacing to achieve good light coupling, using either UV or ...

ves & Arrays V-Groove 2D-Array Fiberguide produces extremely tight tolerance one-dimensional (V-Grooves) and two-dimensional arrays using our pat. ed manufacturing techniques. These arrays ...

and data center applications. With customizable V-groove chips and covers, and Corning's capability of developing and making specialty fibers, our FAU products can meet a wide variety of ...

A fiber V-groove array refers to a precise arrangement in which one or multiple optical fibers (single-mode, polarization-maintaining, or multimode) are seated within microscopic V-shaped grooves ...

Our high-precision fiber arrays are engineered to meet rigorous technical specifications, enabling customers to define critical parameters such as channel count, fiber spacing, fiber types, face ...

We manufacture high-precision custom V-groove fiber arrays for SM, MM, PM, MCF, and UHNA fibers. Our portfolio includes standard arrays, collimated arrays with microlens arrays (MLA), lidless or ...

Atomica's advanced wafer processing enables the integration of densely packed V-grooves to support high count fiber arrays in silicon photonics, enabling low cost reliable fiber attachment in a high ...

OZ Optics V-Groove chips assist in developing next generation photonic devices. The array components allow precise alignment of either ribbonized or individual fibers in a linear array.

V-Groove Chips and Arrays Corning offers a suite of cost-effective glass V-grooves and arrays that are pitched at 127 microns and 250 microns, with product configurations ranging from 1 to 96 channels. ...
