

To connect various high voltage (HV) components to the HV system, we also deliver a wide variety of busbars. In cooperation with the customer, these can also feature our Bus Bar Insulation Tubing (BBIT).

Ma&#223;geschneiderte E-Mobility-Gestaltung: Unsere Busbars werden nach Kundenanforderungen im individuellen Design entwickelt und produziert. Hier mehr erfahren .

The German high voltage busbar protection devices market exhibits a notable consolidation trend, with key players capturing significant market share through strategic acquisitions ...

We offer complete systems made of copper or aluminium in air- or water cooled performance. All systems produced by CONNEX GMBH were supplied including supports, insulation parts and wall ...

You produce your busbars with consistently high quality and convincing cycle rates. Very fast tool changes allow you to cover a wide range of variants and respond flexibly to your customers" ...

At Datum, we specialise in custom, thin metal, busbar manufacturing, delivering precision copper, aluminium, nickel and nickel plated steel busbars for high-voltage battery systems, including EV ...

The main functions of the busbar are the safe, short-circuit-free conduction of electrical energy between the drive and charging components and the protection of assembly and workshop personnel from ...

We engineer and manufacture Customized High Current Busbars Solutions made of Copper, Cuponal and Aluminum - made in Germany and Poland.

We flexibly manufacture suitable & safe busbars for your switchgear made of copper or aluminium. In addition to the realisation of complex shapes, we also take on the assembly work of the DC link rails. ...

A superconducting busbar system for 20 kA has been installed and tested in a chlorine electrolysis in Germany . In the follow-up project, DEMO200 , a 200 kA superconducting busbar system for ...
