

ADD and ADHD are not different conditions but rather different names for the same neurotype. ADD is an outdated term that refers specifically to the predominantly inattentive type of ...

This issue often leads to confusion about how to properly integrate open beam laser diodes into your system, so to help this blog aims to elaborate on the information provided in our ...

ADHD is one of the most common disorders diagnosed in children. Symptoms begin in childhood and usually continue into the teen years and adulthood.

FRED software has great flexibility when it comes to modeling laser diodes. In this application note, laser source models from simple to detailed will be described.

ADD (attention deficit disorder) is the term commonly used to describe a neurological condition with symptoms of inattention, distractibility, and poor working memory.

ADD and ADHD are terms used for attention-related challenges, but ADD is an older name that focused only on problems with attention. ADHD is the current term and includes all ...

The information contained within this tutorial will give all the general information necessary to create an excellent laser diode system. For specific questions about laser diodes, mounts, and drivers please ...

ADD is an outdated name for ADHD. It was changed in 1987. People with ADHD may present as primarily inattentive, primarily hyperactive-impulsive or both.

ADD vs ADHD: What sets them apart? Learn the difference between ADHD inattentive, hyperactive/impulsive, and combined type to better understand these conditions.

After enabling hybrid laser, in the layers" laser parameter panel, an additional "diode laser" option can be found. After selecting these options, using the hybrid laser add-on's diode laser function in the ...

This is the ultimate beginner's guide to the laser diode. Learn how lasers work and how you can use them in your own projects with this guide.

Laser Diode Module Tutorial: Description: This 100mW laser module emits a small intense focused beam of visible red light. The module can be used with an Arduino and photo resistor module to ...

Upgrade your FLUX Beamo with even more versatility! In this video, we'll walk you through how to install

the Diode Laser Add-On for the FLUX Beamo, step by step.

In this article, we'll explore what ADD is, its symptoms, causes, and available treatments to help manage the condition. ADD, now classified as Predominantly Inattentive Type ADHD, is ...

Does your child have trouble paying attention? This may be a symptom of attention deficit hyperactive disorder (often called ADHD or ADD). Read more.

The tutorial initializes by displaying a blue diode laser in full operation and coupled to an Anamorphic Prism System set with an orientation that yields a 2x beam expansion.
