

How to connect the beam splitter and the fiber optic tray

This document describes the installation of optical fiber with both single fiber and/or ribbon fiber splices into Optical Splice Enclosure (OSE) metal splice trays (Figure 1).

Unwrap the required length of input fiber from the spool. Note that the last coil is attached to the spool with adhesive tape, do not remove the tape, or unwrap the last coil.

In this guide, we'll explain how to safely connect a splitter to another splitter, covering both fiber optic and coaxial setups.

This video provides a step-by-step guide on how to efficiently install optical splitter into a fiber terminal box, demonstrating a professional and reliable ...
