

Latvia procures 2 5G core switches

For the price of some 2.5G switches nowadays, it makes more sense to switch to 10G, a standard largely adopted by most manufacturers. However, just stray away from no-name Chinese switches.

In collaboration with Nokia, LMT is the first operator in the Baltic region to commercially launch the next-generation 5G Standalone network - also known as 5G+ - starting this July.

The investment will go towards modernising the network and deploying 5G technology, as well as maintaining network capacity and building a new core data infrastructure.

Latvijas Mobilais Telefons (LMT), Latvia's largest communication service provider, has chosen Ericsson to power its next phase of transformation geared towards delivering 5G across ...

What's the impression from an outsider's perspective? Will: Latvia, in my mind, has been a real leader in 5G. That credit is based on the country realizing very early that 5G was going to be ...

By the end of 2026, Bite Latvija's network is expected to operate more than 1,200 base stations, nearly 1,000 of which will be equipped with 5G. The operator states that the upgrades will ...

NEW DELHI: Finnish telecom gear maker Nokia said Latvian telecom operator LMT has selected its 5G Standalone Core for deployment in the country, to deliver new services such as ...

As part of Tele2's core evolution, Nokia will deploy its Cloud Packet Core products to support both 4G and 5G core network functions and enhance network scale, performance and reliability.

Nokia announced that it is extending its partnership with Tele2 to deploy 5G RAN in Estonia, Latvia, and Lithuania in a long-term deal. The deal will continue to build on the 25 years of strong and close ...

Latvia has recently accused Belarus of letting illegal migrants cross into Latvia. This is an instance where border security, police, and military need to collaborate.
