

Low-loss solution for Australian fiber optic handheld light sources

This hand-held Multi-Wavelength Single Laser Light Source provides high stability multi-wavelength output from a single laser source and measures optical loss on both SM and MM fiber cables.

A family of pocket-sized and low-cost optical light sources for the installation and maintenance of single mode and multimode fibre optic networks..

VIAMI light sources offer versatility in measuring fiber optic light continuity, loss and quality in field, lab, and manufacturing environments. Versatile and compact handheld solutions are offered for field use ...

Tier-1/2 solutions with controlled source launch conditions for maximum accuracy and repeatability designed to remove uncertainty from multimode fibre testing. [Learn More](#). [View Light Sources in the ...](#)

Handheld fiber optic test equipment. Cable and optical test solutions for enterprise, service provider and industrial networks. Manufactured in Australia

Essential building blocks for fiber testing, EXFO offers optical light sources with multiple wavelength options for component testing, R& D, manufacturing and field environments. Faster and highly reliable ...

SCHOTT's collection of KL Fiber Optic Light Sources offers a broad choice of controllable illumination for all areas of stereo microscopy. It combines homogenous light with long LED lifetime and ergonomic ...

Explore AFL Australia's optical light sources for testing single-mode and multimode fiber networks. Designed for precision in telecom, broadband, and FTTx systems. Rugged, reliable, and with an ...

FS offers a range of fibre optic light sources, choose from a variety of cost-effective light sources. Money Back Guarantee.

Low-loss solution for Australian fiber optic handheld light sources
