

Fiber Optic Attenuators FOCONEC offer a wide range of plug type SC, LC, FC, ST & MU attenuators, which are used to reduce excess optical power from the transmitter that can result in over-saturation ...

Shop DigiKey's large in-stock selection of Fiber Optic Attenuators. View inventory, pricing and order now for same day shipping!

The single-mode adjustable fiber attenuator provided by JCOPTIX can be manually adjusted, which is flexible, convenient, and highly stable, avoiding damage to optical components caused by excessive ...

This fiber optic attenuator features an adjustable attenuation value of 0-15dB, ensuring stable optical power on its original transmission wave. It has high attenuation accuracy, low added ...

These receptacle-style attenuators provide mode independent fixed attenuation when used with multi mode fibers. The insertion loss will not depend on how the light is launched into the fiber. This is a ...

VIAVI offers the industry's most complete range of optical attenuators for installation and maintenance of singlemode and multimode fibers and advanced, photonic-layer solutions for lab and production ...

Our SM fixed optical attenuators are fiber connectors that can be attached to an FC/PC or FC/APC SM fiber patch cable. We also offer variable optical attenuators for MM fibers with FC/PC or SMA ...

Find reliable adjustable attenuators with 0-90dB range, stepwise control, and custom options. Compare top suppliers, verify specs, and click to source high-quality RF and fiber optic components today.

FS fixed and variable fiber optic attenuators with leading attenuating fibers guarantee consistent and stable fiber attenuation (0~60dB) in WDM transmission.

A fiber-optic attenuator is a passive device used in fiber optics to reduce the power level of an optical signal. It is often used in optical fiber communications to adjust the signal to a suitable level for a ...
