

Fiber optic photoelectric sensors offer remote sensing/mounting options for long-distance or low- or no-power endpoint applications. Installations can be customized using cuttable fiber optic cables. An ...

As manufacturing continues advancing toward smaller products, tighter tolerances, and more compact equipment, the importance of fiber optic sensing solutions has never been greater, ...

While holding the fibers and bushings against the face of the MINI-BEAM, tighten the clamp screw to secure the fibers and bushings in place. Using this device for personnel protection could result in ...

Here we report the mounting of an SPR microcavity on the end facet of a single-mode fiber to create a miniature temperature sensor. The SPR microcavity is coated with a temperature ...

We offer custom fiber optic solutions tailored to your specific application. Highly miniaturized fiber-optic probes with diameters starting from 50 μm . For metrology and testing, telecommunications and life ...

With minimal time required for mounting the fibers the productivity can be enhanced for machine builders and the easy setting of the amplifiers simplifies production changes for machine users.

photoelectric sensors including fiber sensors, displacement sensors, vision sensors, LED lightings for machine vision, non-contact thermometers and accessories for sensors. OPTEX FA GLOBAL

This is a series of fiber optic sensor heads designed to be connected to a fiber optic sensor amplifier. The FU Series offers a wide variety of options including thru-beam, reflective, retro-reflective and ...

Fiber optic sensors and cables are the perfect solution for applications where the direct mounting of sensors is not possible due to space restrictions, temperature extremes, and so on. Small fiber optic ...

Learn more about miniature optical sensors for detecting the presence, position and orientation of small, fast-moving objects in limited installation space.
