

Energy Internet (EI) is a novel concept that can be thought of transformation of smart grids into the Internet where different energy forms can be integrated to provide more efficient and resilient power ...

Our research addresses the critical intersection of communication and power systems in the era of advanced information technologies. We highlight the strategic importance of communication base ...

We refer to this vision as the Internet of Mobile Energy (IoME). This projects explores how to realise the IoME through emerging technolgies, such as blockchain, IoT, and machine learning.

In this paper, a holistic review of the energy Internet evolution in terms of the architecture, types of ERs, and the benefits and challenges of its implementation is presented.

f energy (IoE) and MI. IoE connects fixed energy infrastructures via informa-tion technologies to optimize energy de ivery and utilization. On the other hand, MI realizes the information dissemination over the ...

With the focus on energy efficiencies to run 5G networks, this white paper aims to place the sustainability objectives in the larger context while setting the stage for the specific techniques ...

Case study results are presented based on live commercial deployments which demonstrate the energy savings and overall performance achieved through the NEC energy saving solution.

With the development of mobile energy storage technology, it is possible to build a mobile energy internet for the business purpose of energy internet. Now the research work of mobile...

In this paper, a holistic review of the energy Internet evolution in terms of the architecture, types of ERs, and the benefits and challenges of its ...

The completion of the integrated energy operation service platform is an important milestone in the construction of the "Internet +" smart energy demonstration project.

Key features of the energy internet such as energy sources, communication technologies, data computation, energy management systems and financial analysis are highlighted to enhance ...
