

If you need any assistance in finding the right optical test equipment and measurement systems for your needs, contact our team of experts at Electro ...

Measure absolute and relative optical power across wide dynamic ranges. Build integrated test systems with light source, switches, attenuators, SMUs, and ...

CI Systems provides a wide range of laser testers, whether stand-alone systems, such as Depot Field Laser Tester, Depot Laser Tester or integrated in a multi-sensor electro-optical test bench.

If you need any assistance in finding the right optical test equipment and measurement systems for your needs, contact our team of experts at Electro-Meters today.

Measure absolute and relative optical power across wide dynamic ranges. Build integrated test systems with light source, switches, attenuators, SMUs, and OPMs to evaluate photonic subsystems.

Optomechatronic tester with flying actuators. T100 is a tester with flying actuators designed to calibrate and test any type of device, module, or product with electronic, optical and mechanical functions, ...

A lightwave component analyzer is a specialized test system that combines the high-speed performance of a vector network analyzer (VNA) with precision optical-to-electrical (O/E) and electrical-to-optical ...

R& D proof-of-concept device test: State-of-the-art, low-volume multi-channel electro-optical I/O test of on-wafer waveguides and PICs. Custom 3D-printed fiber tips support all optical coupling ...

PIS&#201;O is able to design and produce tailor-made electro-optical test modules integrating LASER/VCSEL sources.

From R& D to mass production, JPT's Module Tester Solution combine laser modules and advanced AOI platforms, empowering industries from consumer electronics and semiconductors to VR/AR and new ...

Fully automated test handler designed to test both electrical & optical characteristics of VCSELs at module-level. It is a fully automated test & qualify system for full LIV sweep test as well as spectral ...

Flying Actuator Optomechanics Tester T100 is a flying actuator tester designed to calibrate and test any kind of device, module or product with electronic, optical and mechanical functions, using the ...
