

Protection relay tester which offers all the characteristics and functions needed for protective relay testing, in a manual or automatic mode, designed for maximum efficiency, flexibility and simplicity, ...

The compact, multi-functional relay test system ARTES 460 is the compact and universal solution for testing protection relays. Its built-in control panel, light weight and low noise ...

It's the ideal test device for all power utilities, power plants, relay manufacturers, panel manufacturers, research institutes, universities, testing companies, etc. In-built analog monitoring & ...

PW460 Protective Relay Test Kit is the comprehensive protection relay testing equipment for all types of protective relays with high accuracy. This relay test kit has in-built output monitoring and recording ...

Verify that your protection relays operate correctly when faults occur. Megger's smart relay testing solutions and expert support help you validate protection performance, improve system ...

Reliably working protection relays are key in modern energy systems. Read on to learn about best practices, challenges, and trends in protection testing.

PW336i protective relay tester is the best economic model with 6 current channels ...

PW336i protective relay tester is the best economic model with 6 current channels and 4 voltage channels, capable of automatic testing differential relay easily without changing cable connection.

A comprehensive testing program should simulate fault and normal operating conditions of the relay. Acceptance testing, commissioning, and startup will include control power tests, current transformer ...

Three phase, class 0.02% or 0.05% protection relays tester up to 120A (360A) and 560VAC with programmable harmonics content. It makes possible to automatic testing of electricity meters, ...

Solutions for Power Industry Testing Protection Relay Test Wide range of solutions for secondary injection testing, protection relay testing and IEC61850 testing in digital substations.
