

Ruggedised fibre optic assembly for field deployable applications.

The FCR-1000 series cable reels are designed to fit Princetel's standard FORJs and slip rings. The rotary joints are protected inside the drum for durability and seamless deployment of single or multi ...

Fibre optic cables are used for the transmission of all optic signals. The transmission between the rotating part (reel body) and the fixed part will then be performed using the fibre optic transmitter.

The reel's center of gravity is low for easy carry. • Cable Protection A tough shell protects the fiber optic cable outside. Polypropylene makes the outer shell very, very strong. The sides of the reel keep the ...

The reel's structural components consist of two flanges, central drum, flange bolts, SmartReel™ test connector and horizontal wood slats (Figure 1) that keep the reel in alignment and ...

Reel in a Box is Corning's innovative packaging solution for small reels of fiber optic cable in all inside plant applications, such as collocation data centers and wireless projects.

With a variety of cable assembly options and configurations, flexibility is provided to meet the specific requirements of each application, including storage efficiency, rapid deployment and ease of operation.

Find out about our cable drum dimensions, weight, length, standard spool and wooden cable reel sizes.

Fiber optic reels are engineered specifically with the protection and deployment of fragile fiber strands in mind. Their design strongly emphasizes structural performance aimed at the proper ...

Cable reels with motor drives are used as a power supply for mobile consumers for automated winding of flexible power or control cables for the following areas:

ADVANCED REEL SYSTEM (MARS Overview OCC is pleased to introduce the Modular Advanced Reel System (MARS™), the industry's first lightweight cable deployment reel system designed specifically ...

The MARS reel, itself, incorporates options for fiber optic cleaning kits, flip-out handle, 30-ft. built-in divider, connector cradle design, and stackable features.
