

Modular power limiters monitor current and voltage levels, automatically responding to excessive values and can cut off the power supply to protect equipment and systems from potential damage.

These electrical spider boxes are built with rugged enclosures to withstand harsh conditions and feature multiple outlets for efficient power distribution. Easy to transport and set up, our spider boxes meet ...

Browse power distribution boxes with circuit breaker protection and multiple outlet configurations. Shop durable solutions for construction and emergency use.

A current-limiting device does not rely upon the zero crossing of the current waveform and can be faster acting than a conventional device, therefore limiting the electrical energy seen during a fault condition.

Choose from our selection of current limiters, including DIN-rail mount branch circuit breakers, surface-mount GFCIs, and more. Same and Next Day Delivery.

The device is intended to provide a total power distribution solution for digital TV, set-top boxes, tablet PC and VOIP phones etc applications, where precision current limiting is required or heavy ...

Eaton's Cooper Power™ series X-Limiter™ clip-mount current-limiting fuses are used for transformer protection, capacitor protection and sectionalizing. Their non-gas evolving element design allows for ...

These switches are useful for general purpose power distribution applications such as digital televisions (DTV), printers, set-top boxes (STB), PCs, PDAs, and other peripheral devices. The current limiting ...

The Mini X-TREME Box product provides morecompact and less costly work-site ...

The Mini X-TREME Box product provides morecompact and less costly work-site power distribution than our popular full size models. Used with various power supply adapters, these units are ideal for smaller

Our commutating current limiters provide fault current protection for systems rated 15.5 through 38kV and for applications that include power transformer protection, system upgrades, reactor bypass, ...
