

This PLC Splitter is a 1x32, with 1 input and 32 output fibers with an even split ...

Planar Lightwave Circuit (PLC) Optical Splitters Wirewerks™ Planar Lightwave Circuit (PLC) optical splitters deliver the best performance, and the highest reliability for today's broadband systems ...

With complete features and high technical specifications, This optical splitter is suitable for a variety of applications, including FTTH, FTTB, -PON, CATV and data networks.

Learn how fiber optic splitters work, types (PLC, FBT), and uses in FTTH/data centers. Understand signal splitting, key specs, and how to choose the right splitter.

We offer ABS box PLC Splitters with a wide range of styles and sizes to split or combine light with minimal loss. All splitters are manufactured using a very simple process that produces reliable, low ...

This PLC Splitter is a 1x32, with 1 input and 32 output fibers with an even split ratio across all fibers regardless of input wavelength. PLC Splitters are available with 900µm loose tube singlemode fiber ...

Fiber splitter solutions from Maxcom featuring PLC technology, low insertion loss, and high reliability. Ideal for CATV, RFoG, FTTx, and FTTH optical networks.

Fiber optical PLC splitters and fiber optic couplers are passive optical devices that are used to split an optical signal into at least 2 and as many as 256 signals. ...

FS PLC Fiber Optic Splitters, Bare/Blockless/ABS/LGX Splitter/Rack Mount Types, support 1xN light distribution, with low IL and PDL for high-reliability transmission.

Whether you're building a Passive Optical Network (PON) or upgrading existing infrastructure, understanding what a PLC Splitter is and how to ...

These devices enable more effective monitoring and management of optical networks. They are available as components, in our quick connect cassettes, or in custom modules and rack-mount ...

PLC (Planar Lightwave Circuits) splitters are developed using silica glass waveguide circuits and aligned fiber pigtailed, integrated inside a miniature package. PLC splitters provide low-cost solution for ...

3MTM Planar Light Circuit (PLC) Optical Splitters that exhibit uniform signal splitting for the most advanced optical networks. These planar silica waveguide devices are packaged in small form ...

The PLC splitter is a micro-optical element using photolithographic techniques to form optical waveguide at medium or semiconductor substrate for realizing branch distribution function.

The PLC splitters shall be available in 1X4, 1X8, 1X16, and 1X32 configurations, with an option for either bare-fiber or pre-connectorized with SC-APC pre-polished connectors. The splitters shall be ...
