

Single-support cable tray

Atkore Channel supports single branches of power or multiconductor control cable or instrument tubing. Ideal for communication, fire alarm, or call station and clock cabling.

Cable tray length is selected based on the load to be supported, the distance between the supports (also referred to as the span), and handling and installation constraints.

A channel cable tray is a compact, single-piece tray system with a narrow base and raised side flanges. Unlike ladder or trough trays, channel trays are designed to support small cable ...
