

2.5G SFP transceiver, 2.5G single mode SFP fiber optical module, 1310nm DFB laser and PIN photo detector, 10Km~20Km transmission with SMF

Our Multi-rate Series 2.67Gb/s transceiver module integrates optics and electronics in a Small Form Factor Pluggable (SFP) package. The 2.5G SFP transceiver provides a complete 2.5G SONET ...

OSFP (Octal Small Formfactor Pluggable) is a high-speed optical module packaging technology designed to meet the growing demand for ultra-high bandwidth and density in modern ...

2.5G SFP optical modules designed for telecom, industrial networking and broadband access applications.

FS 2.5G SFP solution with low power consumption provides an ideal connection option for 2.5G Ethernet over Cat5e cable, switch to switch interface, and AP/Router interface.

Optcore 2.5G SFP transceivers are an industry-standard small form-factor pluggable module for SONET OC-48, SDH STM-16 (2488 Mbps) applications. These SFP modules comply with the SFP MSA, CE, ...

The OSFP module contains a PCB with contact pads (i.e., module PC board; paddle card) that mate with a connector as specified in section 5.10 of this document. Critical dimensions for the contact ...

Discover how OSFP modules provide high-speed optical connectivity for data center applications. Learn about the different form factors, data rates, and compatibility options available.

The Octal Small Form Factor Pluggable (OSFP) Connector System provides single- or dual-port, 8- or 16-lane I/O connectivity with DAC, AOC, ACC and optical modules for high-density switch applications.

Discover how OSFP modules provide high-speed optical connectivity for data center applications. Learn about the different form factors, data rates, ...

The OSFP module contains a PCB with contact pads (i.e. module PC board; paddle card) that mate with a connector as specified in Section 4.10 of this document. Critical dimensions for the contact pads ...

By utilizing integrated thermal heatsink technology in the plug, OSFP products provide superior thermal performance and the signal integrity needed to support 400G data rates.
