OverviewStandard implementationTechniquesStandards developmentUsesTerminologyPower management features and integrationNon-standard implementationsStandards-based Power over Ethernet is implemented following the specifications in IEEE 802.3af-2003 (which was later incorporated as Clause 33 into IEEE 802.3-2005) or the 2009 update, IEEE 802.3at. The standards require Category 5 cable or better for high power levels but allow using Category 3 cable if less power is required. In multi-pair cases, PoE supplies power as a common-mode signal over two or more of the differential pairs

Power over Ethernet switches are a game-changer for both businesses and home networks, offering seamless connectivity and power delivery through a single cable.

The Switch is a tablet that can either be docked for home console use or used as a portable device, making it a hybrid console.
