With our filament winding technologies, Advanced Composites Inc. manufactures carbon fiber tubing, fiberglass tubes, and other hollow structures. These tubes and structures possess excellent tensile ...

Due to size and ever-changing shipping rates, an Optimum Composites team member will contact you for delivery information and to collect payment for shipping or freight. These prices vary due to size ...

Our two direct weekly services and regular feeder vessels from Uruguay provide you with a connection to our vast ocean fleet. From here, the rest of the world is just a short hop away.

Ideal for optical fiber winding and mass production of UAV reels, it offers smooth wire laying, excellent communication signal performance, and single-side multi-layer winding.

Roblon Precision Coiling Unit (PCU) eliminates the need for manual guiding of the cable in the take-up process. The cable is positioned perfectly side by side without major gaps or cable crossings, ...

NovaLynx fully automatic fiber winding machine is designed for high-speed and precision winding of optical fibers and ultra-fine wires. It provides stable tension control, uniform arrangement, and ...

The tubes can measure a diameter of 6 mm to 1 m with angle variation for deposit fiber. This kind of production can adapt according to requirement specification (filament winding program, production, ...

Modern fiber tube systems are equipped with sensors that provide real-time data on cutting pressure, temperature, and beam stability. This data can be integrated into Enterprise Resource Planning ...

Our Customized Fiber Optic Winding Machine delivers high stability and ultra-high precision for advanced fiber coil manufacturing.
