

It is estimated that a single GB200 cluster comprising 576 GPUs necessitates approximately 18,432 single-ended 800G optical modules.² This ...

With extensive experience deploying large scale direct-to-chip (DLC) liquid-cooled AI systems, Supermicro's leading liquid-cooling technology advancement powers NVIDIA GB200 NVL72, an ...

The NVIDIA GB200 NVL72 by HPE is rack-scale system is optimized to accelerate large AI model training, fine-tuning, and real-time inferencing for AI models over 1 trillion parameters.

With unmatched interconnect speeds and energy efficiency, the GB200 NVL72 sets a new benchmark for AI and HPC workloads. All specifications are subject to change without notice. Please visit our ...

This document contains detailed information about the hardware and software stack of DGX Grace Blackwell rack scale systems (such as GB200 and GB300). Each rack is an NVL72 rack ...

Multiple racks connect with NVIDIA Quantum InfiniBand to scale up to tens of thousands of GB200 Superchips.

A: The launch of GB200 is positive for the optical module industry, as it meets the demand for cross-cabinet connections, which exist for most customers. The current GB200 has a ...

It is estimated that a single GB200 cluster comprising 576 GPUs necessitates approximately 18,432 single-ended 800G optical modules.² This density has fundamentally altered ...

GB200 takes advantage of the high-bandwidth memory performance, NVLink-C2C, and dedicated decompression engines in the NVIDIA Blackwell architecture to speed up key database queries by ...

NVIDIA can sell GB200 modules to Foxconn for one customer, while directly supplying Dell for another. Some OEMs like Dell/HPE might design their own PCBs and simply purchase Blackwell GPUs from ...

Today we are going to go from A to Z on the different form factors of GB200 and how they changed versus the prior 8 GPU HGX baseboard servers. We will break downs on unit volumes, ...
