

Western European FISO fiber optic displacement sensor

Telemac has integrated FISO technology in its Civil and Geotechnical fiber optic sensing product lines. Telemac is also providing FISO sensors for R& D applications: - Refractive index, Displacement, ...

Discover all the products from FISO Technologies and see a list of their distributors. Contact the manufacturer directly for a quote.

This article reviews specifically the advanced fiber optic displacement sensing techniques that have been developed in the past two decades.

WLPI-based fiber optic displacement sensor for geotechnical, Aerospace Defense, aviation, transportation, test and measurement and general industry.

FISO is a leading developer and manufacturer of fiber optic sensors and signal conditioners used in medical, energy, process control and R& D applications.

The BUS System is a fiber optic multi-channel signal conditioner for FISO's fiber optic strain, temperature, linear position & displacement, force & load, and pressure sensors. This is the ideal ...

FISO Technologies develops, manufactures and commercializes a complete range of fiber optic sensors. The sensors are destined to take measurements of different physical and chemical ...
