

Where to install the terminal box for linear temperature sensing cables

Strain Relief Connectors, or equiv-alent, shall be installed in all junction boxes where Kidde Fire Systems LHS enters or exits the enclosure, in order to hold the detector securely and to provide a ...

The document provides specifications and installation instructions for ProReact Plus Digital Linear Heat Detection Cable. Key details include: - The cable uses fixed temperature detection technology to ...

Where needed you can connect two lines of cable or leader cable to Signaline HD+ Sensor cable. To do this the Signaline HD+ JB should be used. This IP rated and high impact resistance box provides a ...

All connections are made within the terminal box. Incoming (from the CIE or previous box) and outgoing (to the next box) cables should be passed through the cable glands and inserted into the appropriate ...

2.1 The LHDC should be installed to cover each cable tray or ladder rack intended for supporting cables. 2.2 The LHDC should be installed such that it can rapidly respond to heat convected and/or radiated ...

The Protectowire Company supplies zone boxes, identified by the letters QC, which contain a compression type terminal strip which allows the installer to directly connect Protectowire conductors ...

Thermocable ProReact Digital Linear Heat Detection Cable Installation Instructions - Find information on how to install ProReact Digital LHD and LHS cables.

The A1343 junction box is designed to join and protect linear heat sensor cable against damage when cable joints are required. The A1343 is weatherproof and is supplied with cable glands and terminals ...

The SafeCable connections are made inside the J-Box using a Screw Terminal (Part #: TC1005X). Be sure to securely tighten the screws on the Screw Terminal to prevent accidental dislodging.

For proximity or special application protection, LHD cable should be installed on or immediately above the hazard in a way that allows for it to be exposed to a rise in temperature caused by a fire condition.
