

Which US companies offer products in the 400g-800g range

InfiniBand and Ethernet interconnects for 100G/200G/400G and 800G infrastructures. Explore the industry's most complete line of Ethernet and InfiniBand interconnects with exceptional low latency, ...

FS offers a growing portfolio of optical transceivers, with speed range from 100M, 1G, 10G, 25G, 40G, 50G, 100G, 200G, 400G to 800G and beyond. The fiber optic ...

AurCore Technology is a network infrastructure company headquartered in Lake Forest, California, delivering enterprise and data center solutions engineered for the AI era.

VeEX offers a comprehensive portfolio of Test & Measurement products and applications to fulfill verification needs, from layer 1 to 4+, from 1.5M to 800G, from lab to field.

Learn how the demands of specialized workloads like big data and AI are driving the transition to 400G and beyond to 800G, revolutionizing data center and network engineering.

Choose from new price-performance options on merchant silicon in our 400G and 800G switches and routers to reach new benchmarks of performance and functionality.

The 1.6T DR4 OSFP pluggable transceiver prototype uses four Lumentum 400G differential EML lasers, as a stepping-stone to a future 3.2T module. The module provides 4x400 ...

Many network operators compare OSFP vs. QSFP-DD when evaluating transceiver options for 400G and 800G deployments. While both form factors support high-speed networking, they differ in thermal ...

The 1.6T DR4 OSFP pluggable transceiver prototype uses four Lumentum 400G differential EML lasers, as a stepping-stone to a future 3.2T ...

Upgrade HPC data center with Naddod's range of InfiniBand NDR solutions for 400G/800G. Our cables and transceivers offer high-speed data transfer and low latency for your needs.
