China has put the first large-scale sodium-ion battery storage station into operation, marking the beginning of the adoption of the new, lower-cost battery for large-scale use.

Let's take a closer look at the significance of this breakthrough, the underlying technology, and the "new era of energy storage" it heralds.

The world's first intelligent grid-forming photovoltaic and energy storage power station, tailored for ultra-high altitudes, low-temperatures and weak-grid scenarios, has been connected to ...

Summary: The world's first utility-scale energy storage power station marks a pivotal shift in renewable energy adoption. This article explores its technological breakthroughs, global applications, and how it ...

China's state-owned power generation enterprise Datang Group said on June 30 that it had connected to the grid a 50 MW/100 MWh project in Qianjiang, Hubei Province, making it the world's...

Georgia Power leaders joined elected officials from the Georgia Public Service Commission (PSC) on Thursday to mark commercial operation of the company's first "grid-connected" battery ...

The Meizhou Baohu energy storage power plant in Meizhou, South China's Guangdong Province, was put into operation on March 6. It is the world's first immersed liquid-cooling battery ...

On December 5, the vehicle-grid interactive integrated station for "photovoltaic storage, charging and discharging" in Nanjing ZTE Industrial Park, which was led by State Grid Nanjing Power...

Recently, BASF announced that its first enterprise energy storage project in China was officially launched at BASF's headquarters in Greater China.
