How do I find a solar company?

That way, you can reach customers who are actively using them to find solar brands. Other important directories include Solar Reviews, EnergySage, Clean Energy Experts, and Consumer Affairs. Make sure your company appears on them. Did you know that 98% of text messages are opened?

Should you offer a streamlined solar installation experience?

Because of the price of solar, and the bar set by companies like Amazon, solar buyers expect a streamlined experience. If you are not offering electronic and on-demand installation updates, documentation, signature requests, and monitoring, you may not be making the best impression.

What makes a good solar installation service?

Consistency is a primary factor in providing better customer service. High-value clients who have had an excellent experience with their solar installation want their next service to meet or exceed their expectations as well. Your team should have consistent, high-quality training to deliver a seamless customer experience every time.

Who buys solar panels?

Eco-conscious individuals, forward-thinking businesses, and public sector entities looking to cut costs and adopt sustainable practices. What type of person buys solar panels? Those who value sustainability, technological integration, and energy independence, ranging from young professionals to retirees. Who is most likely to use solar energy?
