---

Asia Pacific held the largest market share of over 54.0% in 2023. Based on technology, the thin-film segment occupied a dominant market share of over 42.81% in 2023. In terms of grid type, the on-grid ...

The global solar PV panels market size is likely to be valued at US\$212.7 billion in 2026 and is expected to reach US\$357.5 billion by 2033, growing at a CAGR of 7.7% during the forecast ...

Asia-Pacific leads the global solar PV panels market, with China, India, and Japan accounting for the lion's share of installed capacity. China alone contributes over one-third of global PV deployment and ...

Half-cell PV modules are expected to hold the largest market share due to their ...

Half-cell PV modules are expected to hold the largest market share due to their higher efficiency, lower resistive losses, and improved shade tolerance compared to traditional full-cell modules.

Geographically, the global solar photovoltaic (PV) market share is divided into North America, Europe, Asia Pacific, the Middle East & Africa, and Latin America.

Depending upon the technology, the market is segmented into ...

Several key factors are propelling the market's expansion. The growing emphasis on energy independence and the need to diversify energy sources are significant drivers. Additionally, ...

By Grid Type, On Grid hold the largest market share of 84.0% in ...

Solar energy conversion through photovoltaic (PV) technology has emerged as a leading renewable electricity source. The market for solar PV panels is driven by growing demand for clean energy, ...

# Market share of various photovoltaic panels

By technology, monocrystalline silicon captured 86.1% of the 2025 solar panels market share, whereas tandem and perovskite architectures are poised to grow at a 31.1% CAGR to 2031.

Depending upon the technology, the market is segmented into crystalline silicon, thin film, and others. The crystalline silicon is expected to hold a larger share by 2034. This can be attributed ...

By Grid Type, On Grid hold the largest market share of 84.0% in 2025 owing to the increasing energy demand & grid capacity needs. By Technology, Thin Film expected to hold the ...
