The Hybrid Solar-RF Energy for Base Transceiver In this work, we propose a new hybrid energy harvesting system for a specific purpose such as powering the base stations in communication networks.

Discover how hybrid energy systems, combining solar, wind, and battery storage, are transforming telecom base station power, reducing costs, and boosting sustainability.

At present, wind and solar hybrid power supply systems require higher requirements for base station power. To implement new energy development, our team will continue to conduct technical research in the future.
