Sineng Electric, a leader in energy conversion systems, has been selected to provide its expertise to the world's largest sodium-ion battery energy storage project.

The project represents the first phase of the Datang Hubei Sodium Ion New Energy Storage Power Station, which consists of 42 battery energy storage containers and 21 sets of boost...

The increasing adoption and growing storage capacities of sodium-ion batteries indicate their transition from laboratory research to market viability, marking a significant milestone in ...

Its capacity will eventually be doubled to 100MW/200MWh, but is almost certain to already be the largest sodium-ion project in the world, as claimed in both announcements.

The state-owned power generation enterprise Datang Group on June 30, 2024 successfully connected the 50 MW/100 MWh system to the grid, making it the world's largest ...

Announced by China Southern Power Grid (CSG) on May 26, this cutting-edge facility integrates both Lithium-ion and Sodium-ion Battery technologies on a large scale to stabilize ...

This is currently the world's largest sodium-ion battery energy storage project and marks a new stage in the commercial operation of sodium-ion battery energy storage systems, Hina Battery ...

Sodium-ion batteries, developed with China's proprietary technology, offer higher thermal adaptability and greater raw material security. Their maximum output and response speed are ...

Developing sodium-ion batteries can effectively solve China's overreliance on imported raw materials for lithium-ion batteries, with the country having rich reserves of sodium resources.

Sudan China-Sodium Energy Storage Project

In a bid to diversify from lithium, China has been exploring alternative energy storage technologies. Sodium-ion batteries have emerged as a promising option due to their abundant raw ...
