New solar tariffs in 2025 could drive prices up. Lock in current rates with Solar Wave before costs spike later this year.

What a solar tariff is, the pros and cons of solar tariffs, a timeline of recent solar tariffs, and why tariffs matter to homeowners when going solar.

Clean Energy Associates released a summary of the seven solar module trade policies and solar panel import tariffs currently in place, including AD/CVD rulings, Section 201/302, and the ...

In his announcement, the President included an exemption for bifacial solar panels. This decision comes after the ITC recommended in November 2021 to extend the safeguard tariffs for an additional four ...

These rules are designed to restrict the use of solar hardware linked to countries like China, North Korea, Russia, and Iran -- but they also introduce supply challenges, rising costs, and ...

In 2022, the solar tariffs were extended, decreasing 0.25% annually to reach 14% by 2026 (U.S. President 2022). The tariff excluded solar products from Canada and Mexico. Tariffs on ...

Clean Energy Associates released a summary of the seven solar module trade policies and solar panel import tariffs currently in place, including AD/CVD rulings, Section 201/302, and the...

The updated reciprocal tariffs effective April 2025 have led to notable price increases for solar panels, inverters, and batteries in the U.S., particularly for products imported from Asia.

The US Commerce Department set final countervailing and anti-dumping duty rates on Monday for crystalline solar cells and modules imported from four southeast Asian countries.

Since 2018, the U.S. government has placed Section 301 tariffs on many Chinese products, including
